# Mechanism

---

## STEP 01. Skin Smoothing & Fitting

An advanced smoothing mechanism reduces skin surface irregularities, creating a smooth, uniform surface.  
A high-adhesion fitting system enhances even, seamless skin adherence.

## STEP 02. Skin Revitalizing

A powerful blend of 10 vitamins, herbal complexes, and naturally derived moisturizing ingredients energizes the skin  
to create a naturally radiant, glass-like glow.

## STEP 03. Film Gel Network

A transparent, flexible gel film forms on the skin to set quickly without smudging or transfer,  
protecting moisture and active ingredients to maintain a smooth, radiant complexion all day without dryness.

# Glass Skin

# Dedicated Puff

- Designed with a micro air-cell structure to hold the optimal amount of product, it enhances adhesion and long-lasting wear while delivering a thin, even finish without caking.
1. **Micro Air-Cell Structure:** The puff's micro air-cell surface evenly distributes the formula, allowing it to adhere smoothly and firmly without clumping.
  2. **Glass Skin Glow:** With each gentle tapping motion, radiance and adherence are enhanced, helping create a clear, glass-like skin finish.
  3. **Quadruple Adhesion Coating:** A four-layer coating prevents the formula from being absorbed into the sponge, reducing internal residue and contamination while ensuring efficient delivery to the skin for minimal product waste.
